FOR IMMEDIATE RELEASE

Stock Equipment Announces Combustion Technologies Corp. as Authorized Sales Representative for SABIA Elemental Analyzers

San Diego, CA – November 4, 2009 – **Stock Equipment Company**, part of the Schenck Process Group, has signed a master sales agreement with **SABIA, Inc.** to market their line of elemental coal analyzers to the power generation market in North America. Stock Equipment's leading market presence in power plant coal feeding and handling makes it a natural sales channel for SABIA's elemental analyzers.

As a result of this sales agreement, Stock Equipment's authorized sales representative, **Combustion Technologies Corp.** will market the SABIA line of elemental coal analyzers to the power generation markets in North Carolina and South Carolina.

SABIA analyzers provide critical, real-time information on the elemental composition of bulk material such as coal, and give customers the ability to monitor fuel quality and optimize combustion efficiency.

About Combustion Technologies, Corp.

Combustion Technologies, Corp. is a privately held company providing service and equipment to the power generation industry and has been a Stock Equipment authorized sales representative since 2009. Combustion Technologies Corp. is headquartered in Apex, NC.

About Stock Equipment Company

Stock Equipment Company, a member of the Schenck Process Group, is a leading supplier of bulk solids material handling, feeding, weighing, screening and automation solutions for the power, mining and process industries and the global leader in the supply of coal feed systems, valves and related microprocessor control systems for power plants.

About SABIA, Inc.

SABIA, Inc. is a privately held firm specializing in materials analysis and process control. SABIA provides integrated bulk material analyzers, associated software options, service, and support for nuclear analyzers and gauges. SABIA serves the coal, coal-fired power, cement, and mining industries. SABIA is headquartered in San Diego, California, USA with office locations and representatives around the world.
